DETAILED ACTION

 An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Allowable Subject Matter

Claims 10-25 are allowed.

The following is an examiner's statement of reasons for allowance:

While Kamiya teaches an automatic programming method/apparatus/computer of selecting workpiece data, creating a workpiece model for lathe turning based on the selected workpiece data (Col. 5, lines 2-34; Col. 1, lines 52 – Col. 3, line 29), and creating a program for controlling a numerical control device based on a product model for lathe turning and the created workpiece model (Col. 13, lines 16-31; Col. 14, lines 30-54), the automatic programming method comprising:

workpiece selecting including

selecting workpiece data involving a product shape and having a smallest diameter for lathe turning around a turning axis, by comparing dimension data of the workpiece data with dimension data of the product model in a state in which the product

model is arranged on the turning axis and the workpiece data is arranged so that a center axis of each workpiece matches a center of the turning axis (Fig. 6, Col. 6, lines 25-39, envelope shape and part shape; Col. 8, lines 26-37); and creating the workpiece model for lathe turning based on the selected workpiece data (Fig. 6, Col. 6, lines 25-39; Col. 8, lines 26-37).

And, Kishi teaches an automatic programming method/apparatus/computer-medium storing a program for selecting workpiece data, creating a workpiece model for lathe turning based on the selected workpiece data (Col. 4, lines 52 – Col. 5, lines 32), and creating a program for controlling a numerical control device based on a product model for lathe turning and the created workpiece model (Col. 11, lines 62 – Col. 12, lines 18), the automatic programming method comprising:

workpiece selecting including

selecting workpiece data involving a product shape for lathe turning around a turning axis, by comparing dimension data of the workpiece model with dimension data of the product model in a state in which the product model is arranged on the turning axis and the workpiece model is arranged so that a center axis of each workpiece matches a center of the turning axis (Col. 8, lines 53 – Col. 11, lines 43); and

selecting, when there is a plurality of workpiece data involving the product shape for lathe turning around the turning axis, workpiece data having a length equal to or longer than the product shape (Fig. 2D, Col. 5, lines 16-32; Figs. 2C, 2D; Col. 9, lines 1-15); and creating the workpiece model for lathe turning based on the selected workpiece data (Col. 11, lines 62 – Col. 12, lines 18).

Application/Control Number: 10/563,321

Art Unit: 2121

And, Susnjara teaches workpiece data is selected from a workpiece database in which a material, a shape, and a dimension of a workpiece are registered (Fig. 3, elements 306, 307, 308, Col. 3, lines 44-50).

None of Kamiya, Kishi, or Susnjara, taken either alone or in obvious combination disclose automatic programming method/apparatus/computer-medium storing a program for selecting workpiece data, creating a workpiece model for lathe turning based on the selected workpiece data, and creating a program for controlling a numerical control device based on a product model for lathe turning and the created workpiece model, having all the claimed features of applicant's instant invention, specifically including: selecting, from a plurality of workpiece data involving the product shape and having the smallest diameter for lathe turning around the turning axis, workpiece data having a length equal to or longer than the product shape and a shortest length.

It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
